

Bid Home page

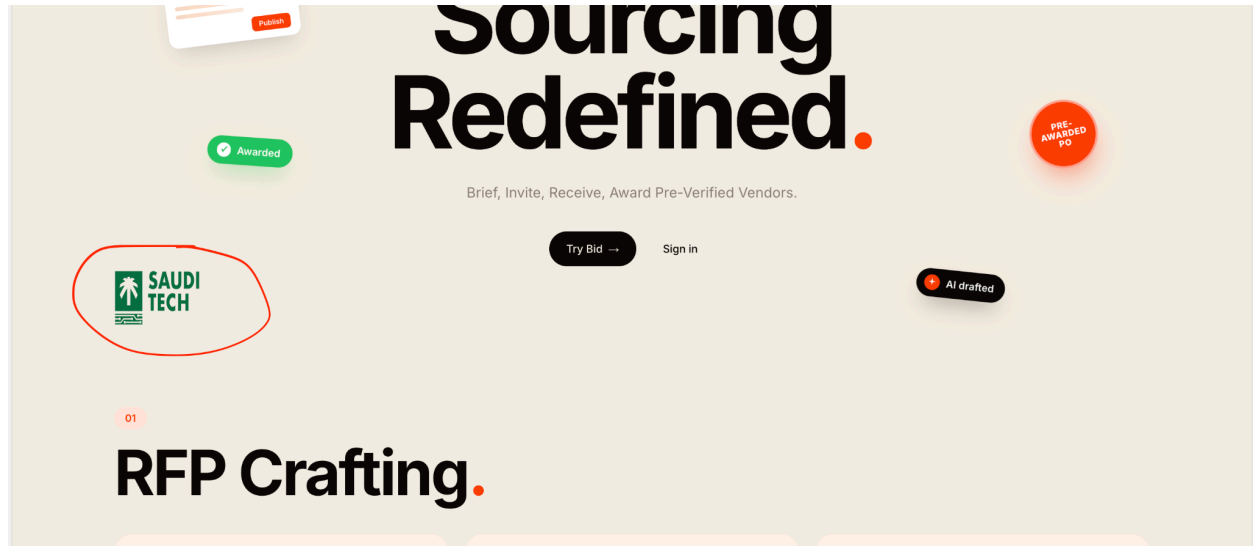

- i love the background color it makes my feel really smooth and it's coordination with the rest of the page components and orange color is perfect
- good job with the branding and color, the font and the floating background components in the hero are awesome too. We want to continue down that path in terms of brand identity

what i feel "isn't right"

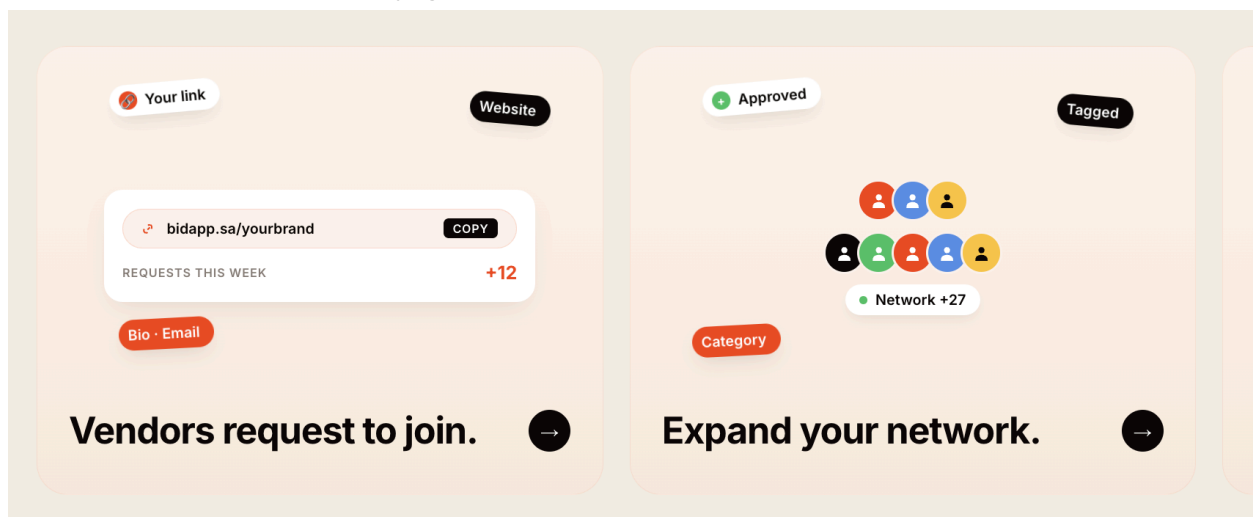

- we need to add a lead magnet (e.x. 14-day free trial maybe)
- it says "For Vendors" but no mention the requester

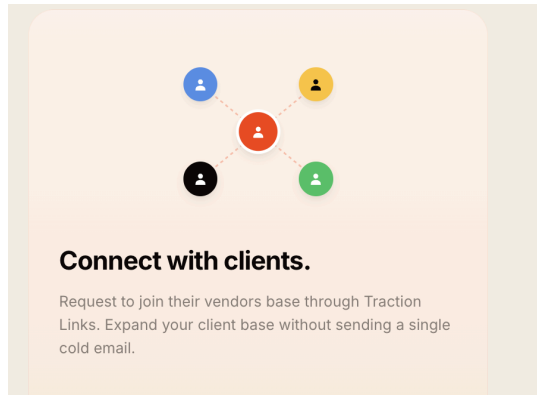

- it starts with the hero section but then it gets to the features right away. the saudi tech badge in between, i feel like its not too visible, add more badges in the feature insha allah to gain credibility (SOC 2 etc..)

- show the user even more how it could benefit THEM if possible. existing phrases like "Invite your vendors.", "create your brief", "Expand your network.", etc.. are really great examples

- Recommended page flow according to our current homepage

1. **Hero** (lead magnet e.x. create your first tender with AI, but you need to sign up)
2. **trust** & customer logos/short testimonials, or security/compliance badges like the saudi tech badge
4. **benefits/features** (pick top 5, currently we have 3)
5. **for vendors/for requester** section
6. **CTA** (maybe book a demo)
7. **FAQ** (but optional)
8. **Footer**
